

Errata

Erratum: See below: correct description of Cover art for
Volume 112, Number 2, March-April 2007.

Symbol in line 2 should be as follows: potential ϕ_{07} ,

Symbol in line 5 should be as follows: uncertainty of ϕ_{07} and.....

[J. Res. Natl. Inst. Stand. Technol. Volume 112, Number 2, March-April 2007]

Cover: The cover art depicts a Helium atom which is the subject of improved ab initio calculations for He-He interactions. These improvements have led to (1) the construction of a new interatomic potential ϕ_{07} , (2) recalculation of values for the second virial coefficient, the viscosity, and the thermal conductivity of ^4He from 1 K to 10,000 K, and (3), the analysis of the uncertainties of the thermophysical properties that propagate from the uncertainty of ϕ_{07} and from the Born-Oppenheimer approximation of the electron-nucleon quantum mechanical system. See the paper by Hurly and Mehl in this issue (pages 75-94) for the complete details of these calculations. Cover art by C.Carey.
